Admixture concrete

Introduction:

Admixture concrete is new product produced in our company. Concrete admixtures are chemicals added to a concrete mix before it is poured into place. Admixtures change how the concrete will behave during the pour and the curing process, or give the concrete certain properties (eg, waterproofing).

Our advantages:

- More than 10 years PCE and PCE raw material polyether monomer manufacturer.
- The largest EO fine chemical new material supplier in China.
- Professional R&D and production team offer you perfect product quality assurance and after service.

Storage: Admixture concrete should be stored at dry, ventilated place which is away from direct sunlight and rain. Seal the container with
