Admixtures are used in concrete cement superplasticizer

Admixtures are used in concrete cement superplasticizer is a new generation friendly environmental superplasticizer. It is a concentrated product, best high water reduction, high slump retention ability, low alkali content for the product, and it having high strength gained rate. It can be widely used in premix of common concrete, gushing concrete, high strength and durability concrete. Especially! It can be used in high strength and durability concrete having excellent capability .

Production Characteristic

1. Admixtures are used in concrete cement superplasticizer is easy to control production: Controlling water reduction ratio, plasticity and air entraining by adjusting molecular weight of main chain, length and density of side chain, type of side chain group.
2. Good slump retention ability. Delaying time of transporting concrete and time of detention at construction site, guarantee concrete pumpability.
3. Admixtures are used in concrete cement superplasticizer have high

strength gained rate: Greatly increasing early and after strength, reducing energy loss. Reduction of cracking, shrinkage and creep.

Product Application area

- 1.The product can satisfy the higher requirement for water reducing performance ,like large volume,long-distant transmission and pumping concrete.
- 2.It is often used in the higher requirement major project,like water conservancy, marine engineering,port, traffic and electric power etc.
3. Especially recommended used in concrete wich high strength, high performance,high durability self-compacting and self-leveling.

Our company

 **Shandong Zhuoxing Chemical Co., Ltd.**
Zibo Zhuoxing Enterprises Co., Ltd.

Company Introduction

Zibo Zhuoxing Enterprises Co., Ltd is an international trade company of Shandong Zhuoxing Chemical Co., Ltd., which is a fine chemical manufacturer with Polyoxyethylene ether HPEG 2400, TPEG 2400, EPEG 3000 with annual capacity 70,000 tons and output 60,000 tons, Polycarboxylate Superplasticizer (PCE) in liquid form and Polycarboxylate Superplasticizer Powder (PCE powder) with total annual capacity of 100,000 tons. We also produce liquid defoamer XP-11 for concrete and powder defoamer XP-12 for dry mixtures.

We develop the most advanced new material, the R&D team is always trying to keep the production technology updated by maintaining its communication with some universities and scientific centers in China.
