Polycarboxylate Synthesis Concrete Additives

Polycarboxylate Synthesis Concrete Additives are specially designed polycarboxylate superplasticizer with owns excellent dispersion performance while maintaining good retention effects due to our cutting-edge processing technique; it has a wide range of application, such as used in the industrial fields of normal concrete, pumping concrete, as well as self-compacting with high strength and durable concrete projects.

Polycarboxylate Synthesis Concrete Additives are environment friendly polycarboxylate superplasticizer that developed by the company. The advantage of that product is not only for high water reducing rate but also for high excellent slump retaining performance .It can improve the fluidity of the concrete. The product is widely applied in common concrete, pump concrete, high strength concrete, high performance concrete, especially applied in self compacting concrete.

Application

1. Applied in ready mix concrete and on site concrete of industrial

building , civil building.

2.Specially suitable for high strength concrete,high durability concrete,self-compacting concrete and so on.

Technical Data

Appearance (25±1℃)	White or light yellow flaky solid
pH Value (1% water solution)	5.0-7.0
Unsaturation mmol/g	≥ 0.38
Moisture %	0.2 max.
Hydroxyl Value mg KOH/g	23.5±2.0
Double Bond Retention %	≥96

Photo

Packing: Woven bag of 25Kgs.
