Superplasticizer Powder PCE

Superplasticizer Powder PCE is a plasticizer for cement mixture. PCE is also called a water reducing agent. The less water to mix in the cement mixture, the better strength of the cured cement.

Use filed

- 1.Our Superplasticizer Powder PCE have advantage of :no chloride,good dispersion, water reduction and early-strength effect,good dispersion, water reduction and early-strength effect,without air entraining , no corrosion on steel bars , good compatibility with portland cement.
- 2.In concrete field,It can wide use in buildings,highway,mixing plant,bridges,dams,ports,and tunnels,electric power,water conservancy and civil engineering works, steam and nature conservation to system components. and so on.
- 3.When compounded with other admixtures,it' s appled in pumping concrete,curing concrete and others that have a special requirement.
- 4.Superplasticizer Powder PCE is suitable to make autotrophic concrete,steam curing concrete,steel concrete and prestress concrete.

Excellent water reducing ability with the increase of concrete strength

Easy to handle in powder form, economical product

Less slump loss, improve workability

Properties

Item	Unit	Standard
Appearance	/	White or light yellow powder
Density	kg/m ³	500±50
pH (23℃)	/	6.0±1.0
Solid Content	%	97.0±1.0
Moisture content	%	≤3.0
Water Reducing Ratio	%	≥25
Cl ⁻	%	≤0.02
Alkali content	%	≤0.3
